

ILP Slimline

Label Feeder

Labels for Life.

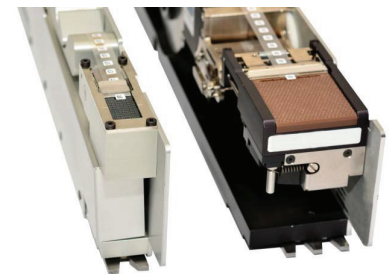

Space Saver Pick & Place Label Presenter

The ILP Slimline is a space-saving solution for pre-printed label placement. With a width of just 30 mm -- half that of conventional label feeders -- the Slimline label presenter requires only one feeder position in a pick & place machine, freeing up valuable space on SMT production lines. It can be used for all label sizes from 3 mm x 3 mm to 25 mm x 25 mm, feeding labels onto the line just like any other component.

- Compatible with many popular pick & place systems
- Precise and automatic placement of labels
- Reliable electronic operation
- Low maintenance costs
- Saves time and money
- Liner material collects in an integrated compartment and can be easily disposed of without stopping production
- High-Speed Presenting of IDENTCO PPL Labels (Results with other labels may vary)

Specifications:

- Minimum label size: 3 mm x 3 mm (.118 in x .118 in)
- Maximum label size: 25 mm x 25 mm (.905 in x .905 in)
- Maximum liner width: 25 mm (.984 in)
- Optional reel holder available
